2522

NOTE.

In reading the figures which appear in this volume it must be borne in mind—

1st,—That percentages of the girls on the total minor population have been given in all cases where the aggregate of the columns “adults”, and “minors” in a particular pergunnah is more than a hundred ;

2nd,—That where the minors of a particular caste or clan are more than fifty, the percentage of girls on minor population has been given, although the aggregate of adults and minors is less than a hundred ;

3rd,—That in the column “without distinction” are shown, grouped together against each particular pergunnah, the aggregate of all those castes or clans in *each of* which the number distinguished by any special name is less than a hundred ;

4th,—That under column “miscellaneous,” the particular castes or clans *named* in the footnotes indicated against them, are shown irrespective of the particular pergunnah heading for the line on which they appear. The footnote at the bottom of the page will give the name of the pergunnah in which they are found. These are isolated cases where a particular caste or clan is found only in a minority of the pergunnahs of the district.

In all districts but Etah these sex statistics have been taken from the caste registers compiled in the Census Office from the abstracts drawn up in the local offices from the original enumeration papers. In the Etah District the figures have been given by the district officer.

The nomenclature of the pergunnahs followed in this volume is not identical with that adopted in Volume I. To prevent confusion, which might otherwise arise, a column has been added to the index of names in Volume I, showing in juxtaposition with the correct name that made use of in this volume.
